

Multi-Zone Amplifiers

AV1230 AV1260

The sound you crave with the flexibility you need.

The B & K Multi-Zone Amplifiers, the AV1230 and the AV1260 allows you to hear news, music and movies with the same clarity, fidelity and audio performance in every room of your home. With the flexibility and ease of both Local and BUS audio inputs and outputs, which allows for a number of units to be cascaded for easy and efficient system expansion. Both the AV1230 and AV1260 multi-zone amplifiers are precision crafted and use the best parts available so your B & K amplifier will deliver years of great performance in your home or install.

- An integration of a multi-room stereo or mono audio distribution. Both amplifiers feature twelve compact and efficient 30W or 60W power amplifiers.
- Level Control - Local individual level control of each amplifier channel. May also be used to equally attenuate the level for both amplifier pairs.
- Dip Switch Configuration - Used to configure the On / Standby / Sense state of the unit, the Bus audio and trigger distribution and Mono / Stereo configuration of the audio pairs.
- Bus Control and Muting - Allowing for single switching of the amplifier audio sense on/off feature and audio signal on any pair of amplifier channels with the Bus Switch enabled.
- Mono Usage - Ability to have up to twelve output channels that may be in mono.

The B&K Multi-Zone Amplifiers are designed for functionality, capability and flexibility while delivering power, performance and durability. The AV1230 and AV 1260 will allow you to readily expand a B & K CT Multi-Zone Receiver system by allowing you to easily add amplification wherever necessary. Multiple AV1230s and AV1260s can be easily linked together to add more rooms or expand a large listening area. If you need to have multiple sources or just one source on our exclusive Input Bus, or use the amplifier pairs in stereo or mono or any combination thereof, B&K Multi-Zone amplifiers do it all and more. Flexible, affordable, easy to install, built tough and great sounding, AV1230 and the AV1260 are perfect for any home or install.

Flexible

The Multi-Zone Amplifiers can be set up for six separate stereo sources, twelve mono sources, a source distributed over the B & K Bus or any combination in-between. The AV 1260 and AV 1230 also allow for amplifiers to be easily linked for a simple system expansion.

Easy Installation

A single stereo or mono audio input and control trigger can be distributed to all channels in the Multi-Zone Amplifiers or even other amplifiers to make audio distribution in your home or install easy and reliable.

Easy to Use

DIP Switches allow for configuration of the audio signal for each pair of amplifier channels including "Local" or "Bus", mono or stereo and muting control.

Specifications

	AV1260	AV1230
Frequency Response	5 Hz - 45 kHz	5 Hz - 45 kHz
Damping Factor (50 Hz)	80	80
Input Sensitivity	0.77	0.77
Input Impedance (Ohms)	33.2 k	33.2 k
IM Distortion (SMPTE)	0.09%	0.09%
Power Rating @ 8 Ohms	55 W	30 W
Power Rating @ 4 Ohms	85 W	55 W
Slew Rate	14 v/ μ s	14 v/ μ s
Amperage (Amps P-P)	16	16
Signal to Noise Ratio, A Weighted	95 dB	95 dB
Number of Channels	12	12
Level Controls	Yes	Yes
Dimensions in Inches		
Width	17"	17"
Height	5 13/16"	4"
Length	15 3/4"	15 3/4"
Shipping Weight (lb)	43	22

The AV1230 & AV1260 complete the perfect package for spreading audio throughout the house. Rated very conservatively at 12 channels of 30 Watts and 55 watts, these amplifiers deliver superior sound and dynamics. Drawing on our experience of over 20 years of award-winning amplifiers, these amps are the most flexible we have ever designed. With features built in that allow the amplifiers to turn themselves on and off, share the same source for all channels or play up to 6 sources independently, these amplifiers redefine flexibility. We take our award-winning sound and let you define where, how and when you want it.
